JAVIER CARRION
Software Engineer | Angular · TypeScript · Full-Stack Web Development · Quality Engineering
Ocala, Florida | javiercarrionjr@outlook.com | linkedin.com/in/technologic | github.com/JavaVista | techno-logic.us

PROFESSIONAL SUMMARY

Software engineer with 6+ years of professional web application development experience and 25+ years across technology, quality assurance, and systems support. Builds and maintains enterprise applications using Angular, TypeScript, Vue, Node.js, Express.js, and MySQL. Brings a strong testing mindset, experience delivering changes through QA to production, and a track record of mentorship, technical communication, and cross-functional collaboration.

TECHNICAL SKILLS

Frontend: Angular, TypeScript, JavaScript, Vue, HTML5, CSS/Sass, Ionic, Foundation, Tailwind, Stencil.js
Backend & Databases: Node.js, Express.js, REST API maintenance and integration, MySQL, schema/database migrations
Engineering & Quality: Git/GitHub, Azure DevOps, Agile/Scrum, regression testing, test planning, unit testing, CI/CD practices; Additional: Flutter, React Native, C#, Python, Firebase, Docker, Azure (working knowledge)

PROFESSIONAL EXPERIENCE

Design Interactive, LLC — Software Engineer II (Web) | Sep 2022–Present
• Develop and maintain web applications supporting complex training, assessment, and human-system integration workflows; collaborate across engineering, design, QA, and project teams.
• Contributed to full-stack improvements on IMITATE and EXTRACT, fixing REST API endpoints with Node.js and Express.js and creating MySQL database migrations; changes proceeded through QA verification before production release.
• Supported Angular application modernization, including a migration to Angular 21 and validation of framework, dependency, and UI behavior changes.
• Built ClassroomXR V2 web features for XRMentor, including participant views, organizer controls, messaging, session timer, screen-sharing and recording interfaces.
• Contributed to Vue-based Gem Cutter micro-frontend work, code review, testing, and delivery planning; informally supported technical coordination across four program-increment planning events.
• Mentor a junior software engineer through structured check-ins and resources on Git, clean code, CSS, Blazor, and software engineering practices.
Design Interactive, LLC — Software Systems Engineer I (Web) | May 2020–Sep 2022
• Developed frontend software using Angular, TypeScript, HTML, Sass, and Foundation; translated requirements and design specifications into application features.

• Worked with multidisciplinary teams supporting research-oriented software programs; performed debugging, verification, and iterative enhancements in Agile delivery cycles.
equivant — Quality Assurance Analyst | Nov 2017–May 2020
• Tested complex court case-management software, including GUI behavior, functional workflows, system operations, and regression scenarios.
• Reviewed specifications, collaborated with software developers on testing, and documented release notes and defects.
CherriPick — Mobile Application Developer (project engagement) | Jul 2019–Dec 2019
• Helped build a cross-platform mobile application with React Native; implemented camera, voice-recording, and date-picker functionality and addressed product defects.
QQSolutions / Vertafore — QA Analyst & Support Specialist | 2013–Oct 2017
• Identified, reproduced, and documented software defects for insurance-agency applications; collaborated with developers and supported customers.

SELECTED PROJECTS & TECHNICAL CONTRIBUTIONS

GDG Event Companion — Open-source organizer PWA | github.com/JavaVista/GDG-Event-Companion
Built an installable organizer companion with dashboard views for events, speakers, venues, and session support; integrated event data and publishing workflow.
SCRUMBLE — Scrum learning puzzle application | techno-logic.us/scrumble/
Developed a Scrum-themed interactive learning application, combining frontend experience with product design, iterative delivery, and educational content.
Developer demos & tooling — Public GitHub portfolio | github.com/JavaVista
Published examples involving Signals, Stencil web components, Angular rendering, and developer workflows to support talks and community learning.

COMMUNITY LEADERSHIP & TECHNICAL COMMUNICATION

Organizer, Google Developer Groups (GDG) Central Florida and Ocala; co-organizer of DevFest Florida and related developer events.
Present technical sessions and workshops on Angular Signals, modern frontend engineering, Flutter, AI-assisted development, and cloud topics.
Write and share developer-focused articles and resources; emphasize practical engineering fundamentals and communication skills.
Speaking: sessionize.com/javier-carrion/ | Community: gdg.community.dev/gdg-central-florida/ | Writing: devfestflorida.com/blog

EDUCATION & CERTIFICATIONS

Professional Scrum Master I (PSM I) — Scrum.org
Udacity — Front-End Web Developer Nanodegree (2019); Intro to Programming Nanodegree (2016)

Additional continuing education: REST APIs, technical communication, security awareness, cloud and AI development

EARLIER EXPERIENCE

Systems engineering, technical support, and business technology roles at Support.com (2008–2013), Vision Care Holdings (2003–2008), and CompUSA (1997–2003). Additional small-business experience as co-owner of Techno-Logic Corporation.
